Foreward

This is an *example* foreward.

Preface

This is the preface.

With two paragraphs.

Acknowledgments

Thanks to everybody for making this happen.

Introduction

A short intro to the book.

This was the second game in a ten game match between Fujisawa Hosai 9p and Go Seigen 9p. It was played on February 25 and 26, 1943.

Go Seigen is regarded as the greatest Go player in the history of Go. We refer to him as a 'living legend' in Korea.

He was born on June 12, 1914, so next year (in 2014), he'll celebrate his 100th birthday. By the way, according to the way age is counted in some Asian cultures, Go Seigen will turn 100 this year (in 2013).

His style of play was so different from other top pros at the time, and he won nearly all of his ten game matches (jubango).

The only ten game match Go Seigen lost was this series against Fujisawa Hosai (4-6 in Fujisawa's favor). However, Fujisawa was taking black in all games and there was no komi. They played with a handicap called 'josen' (black in all games) because Go Seigen was 8 dan and Fujisawa was 6 dan at the time.

Fujisawa Hosai was very famous for his mirror Go. He kept experimenting with mirror Go because he wanted to learn all about it.

He didn't just mimic though, he spent more time than his opponents did, and he often got into byo-yomi situations (was short of time) in the middle game. He played with the sort of full concentration that Cho Chikun 9p does.

There were two famous players named Fujisawa in the Japanese Go world. Fujisawa Shuko (Hideyuki) 9p was the uncle of Fujisawa Hosai, even though he was 6 years younger.

Fujisawa Hosai was also the first professional player to be promoted to 9 dan under the Japanese Oteai system (Go Seigen was the second). They played two more ten game matches on even terms when they were both 9 dan (the only two 9 dans at the time) and Go Seigen won both of them.

Fujisawa plays black. There's no komi in this game.

Diagram 1
(Move: 1)

Diagram 2
(Moves: 2-4)

Even though many players, including (notably) Go Seigen and Kitani Minoru, had experimented with different openings in the 1930s (the shin fuseki period), the star point still wasn't especially popular during this period (1940s).

Compared to today's games, star point openings appeared much less often back then.

Diagram 3
(Move: 5)

This opening seemed to be popular at the time.

Diagram 4
(Moves: 6-13)

Even though it makes white's stones heavy, the peep at A is *aji keshi* (reduces black's future opportunities). Peeping like that is uncommon in modern games.

Variation 1 from (10)

This is more common.

Variation 2 from ⑩

Black can aim to invade at A later. For example, after approaching at B.

Variation 3 from ⑩

Black might also consider pinching here, to make his stones in the top right corner work effectively.

Variation 4 from ⑩

It used to be that white would play here now, and this leads to fighting after black cuts with A or B.

Variation 5 from ⑩

Black might cut and fight like this.

Variation 6 from ⑩

White should create some aji in the corner first.

Variation 7 from ⑩

Now moves like A and B will be sente for white later and white can use them to help his out four stones on the right side.

Variation 8 from ⑩

White could settle his group like this.

Variation 9 from ⑩

White could also choose play here.

If black attaches,

Variation 12 from (10)

White can just extend.

Variation 13 from (10)

Variation 14 from (10)

Variation 15 from ⑩

Diagram 5
(Move: 14)

If black hadn't exchanged A for B, he could aim to invade at C, planning to connect under at D or run away later. The forcing move at A reduced black's future potential for invading.

Diagram 6
(Moves: 15-16)

This large knight's enclosure was Go Seigen's favorite. You can see this enclosure a lot in his games. Since there's no komi, white should play more actively, to lead things towards a complicated game.

Black should double approach in the top left next and there are several options (A-D). If black plays elsewhere, white can play a pincer extension at E, creating a good relationship with his enclosure in the lower left.

Diagram 7
(Move: 17)

Black chose this double approach. This is the most common move in this situation. Black aims to develop the top area while also helping his stone at A.

Diagram 8
(Moves: 18-23)

In this case, this extension is better than A, because white's stones are more solid now.

Variation 16 from ②0

This is also conceivable.

Variation 17 from ②0

If white attaches here,

Variation 18 from ②0

Pushing up here is good.

Variation 19 from ②0

This hane is the right move for white.

Variation 20 from ②0

It's another game.

Variation 21 from ②0

White shouldn't play here, because

This is painful.

Variation 22 from ②0

The result it better for black.

Variation 23 from ②0

Variation 24 from ②0

White would pincer here, and it's similar to the game.

Variation 25 from ②0

If white plays here, white will have bad shape after black exchanges A for B.

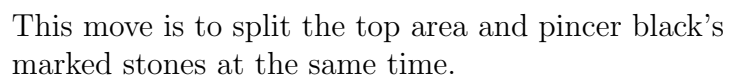

Diagram 9
(Move: 24)

Variation 26 from 23

The game might continue like this now.

Variation 27 from 23

If white still plays here,

Variation 28 from 23

Black would choose this shape now, which makes miai of A and B.

Variation 29 from 23

Black moves out with good shape.

Variation 30 from 23

Variation 31 from 23

Black can jump here and it's not easy for white.

Diagram 10
(Move: 25)

This is the right move. If black doesn't play here, white's approach at A will be very good.

White hits another vital point. This has been white's plan since playing at A.

Variation 32 from ②⑥

Sometimes it's good to move out by leaning on the pincer stone, with a shoulder hit like this. However, in this case,

Variation 33 from ②⑥

Black's shape becomes awkward after white plays like this and it's hard for black to find a good move now.

Diagram 13
(Moves: 31-32)

This move was fast and flexible. It shows Go Seigen's style. White's aiming at the attachment at A.

Variation 34 from 31

White could also move out more carefully like this, but it's slower and Go Seigen thought the move he played in the game was better.

Variation 35 from 31

If white jumps like this,

Variation 36 from 31

Black will peep first, to make white heavy, then

Variation 37 from 31

Lean against this group to build power.

Variation 38 from 31

And cap here. Black's attacking in good form and white's group is heavy. Black still has the sequence A-C in reserve, so he can connect under or live easily if he has to later. There's also a vital point at D now.

Diagram 14
(Move: 33)

This jump struck at a vital point in white's shape.
Now black can aim to cut.

Variation 39 from 32

If black pushes here now,

Variation 40 from ③2

This attachment is good.

Variation 41 from ③2

White's made good shape by sacrificing the marked stones.

Variation 42 from ③2

You might worry that black will cut here, but

Variation 43 from ③2

This would be a disaster for black.

Variation 44 from ③2

Cutting here isn't a good idea either.

Variation 45 from ③2

The ladder at A favors white, so A and B are miai.

Variation 46 from ③2

White will win this capturing race.

Variation 47 from ③2

If black plays solidly like this,

Variation 48 from ③2

White can start making shape by playing here.

*Diagram 15
(Move: 34)*

This head-butt is a good response for white. It stops black from cutting at A or B.

If white attaches here now,

Variation 49 from **33**

This hane is a good response.

Variation 50 from **33**

Variation 51 from 33

White's in trouble. A is really helping black a lot.

Variation 52 from 33

If white comes back here,

Black’s shape in the corner is very solid and strong. This is bad for white, even though white has sente.

Variation 53 from 33

Black extended here, with fighting spirit, but it was greedy.

Diagram 16
(Move: 35)

Variation 54 from ③4

Black should have pulled back.

Variation 55 from ③4

If white blocks here,

Variation 56 from ③④

Capping here is nice.

Variation 57 from ③④

The flow of the stones is good for black.

Variation 58 from ③④

If white jumps here,

Variation 59 from ③④

Now black can extend here and there are no problems for black.

Variation 60 from ③4

Black can connect under like this.

*Diagram 17
(Move: 36)*

White can hane here now. Go Seigen's play is very lively and sharp. He likes ko fights and trades.

Diagram 18
(Moves: 37-38)

White's willing to sacrifice the marked stones, because he knows he can get compensation in the corner.

Diagram 19
(Moves: 39-41)

This was black's plan, but

This peep was brilliant!

Diagram 20
(Move: 42)

If white blocks here, without peeping at A first,

Variation 61 from 41

Black can cut here now. White seems to be in trouble, but it's very complicated.

Variation 62 from 41

If white plays here,

Variation 63 from 41

It's hard for white to capture the marked stones, so it's good for black.

Variation 64 from 41

This move looks similar to the game, but

Variation 65 from 41

This move is very nice.

Variation 66 from 41

This is better for black.

Variation 67 from 41

Variation 68 from 41

If white keeps going,

Variation 69 from 41

White still can't save the marked stones.

It looks complicated.

Variation 70 from 41

This hane doesn't work well for black.

Variation 71 from 41

Variation 72 from 41

It's a capturing race, but

Variation 73 from 41

Black's short of liberties, so instead...

This push is right and,

Variation 74 from 41

Now, A and B are miai for black.

Variation 75 from 41

Variation 76 from 41

If white blocks here to fight,

Variation 77 from 41

This extension is good, and

Variation 78 from 41

White can't save the marked stones.

Variation 79 from 41

White dies.

Variation 80 from 41

It's about the same. White's still dead.

Variation 81 from 41

A and B are miai for black.

Variation 82 from 41

If white reinforces here,

Variation 83 from 41

Black can capture the corner. It's a catastrophe.

Variation 84 from 41

This is a tesuji for capturing races, and white's corner stones are dead now.

Variation 85 from 41

If white plays like this, which isn't good,

Variation 86 from 41

This connection is good for black. A and B are miai for black now.

Variation 87 from 41

Blocking here is the best white can do now, and

Variation 88 from 41

This move doesn't work anymore.

Variation 89 from 41

Black can't extend his liberties. White wins the capturing race.

Pushing here isn't good either.

Variation 90 from 41

Black has to come back here, and

Variation 91 from 41

Variation 92 from 41

Black needs one more move at A, so this isn't a satisfactory result for black either.

Variation 93 from 41

If black caps here,

This hane is wrong,

Variation 94 from 41

White can capture either of black's marked stones, but black will still capture the three cutting stones. This result is good for black, because black's outside influence will be very powerful.

Variation 95 from 41

White can connect under, but

Variation 96 from 41

Black can come back here to attack white. This is good for black.

Variation 97 from 41

This is the vital point, and black's captured.

Variation 98 from 41

The game's over.

Variation 99 from 41

Black can't atari on either side.

Variation 100 from 41

Black should answer here.

Variation 101 from 41

If white plays here,

Variation 102 from 41

Black can connect here now.

Variation 103 from 41

Variation 104 from 41

This is good for black.

Variation 105 from 41

This is good to avoid ko, and white's short of liberties.

Variation 106 from 41

If white wants to trade,

Variation 107 from 41

It looks good for white, but there's bad aji in the corner.

Variation 108 from 41

White can't simply capture the corner.

Variation 109 from 41

If white answers like this,

Variation 110 from 41

This attachment is good.

Variation 111 from 41

A and B are miai for black.

White need to play here, and

Variation 112 from 41

Black can live.

Variation 113 from 41

Variation 114 from 41

If white extends solidly,

Variation 115 from 41

Black's shape is flexible, and not easy to kill.

Variation 116 from 41

White is cut off and in trouble.

Variation 117 from 41

White is in trouble like this too.

Variation 118 from 41

This should be the best for white,

Variation 119 from 41

However, this is still better for black than in the actual game. That's why Go Seigen's move in the game was brilliant.

Variation 120 from 41

If white wedges here first,

Variation 121 from 41

This is playable for black.

Variation 122 from 41

Black can also push here first, and

Variation 123 from 41

Then cut here.

Variation 124 from 41

It's similar to the actual game, but there's no exchange of A for B. White's corner is small now.

Variation 125 from 41

If white turns here now,

And then peeps here,

Variation 126 from 41

Black will just block off the corner now.

Variation 127 from 41

And black can make a base like this. The move order in the game was better for white.

Variation 128 from 41

Black played here in the game, but now

Diagram 21
(Move: 43)

Variation 129 from ④2

If black pushes down here,

Variation 130 from ④2

The result looks ok for black, but

Variation 131 from ④2

White can come back here, and

Variation 132 from ④2

This move will be annoying for black.

A is sente for white later, and black's territory at the top is so small.

Variation 133 from ④2

Black can't block here,

Variation 134 from ④2

It's a ko, and black's in trouble.

Variation 135 from ④2

If black simply connects,

Variation 136 from ④2

Variation 137 from 42

Go Seigen said he planned to trade like this.

Variation 138 from 42

White lives comfortably in the corner and black's top right group is still unsettled.

Diagram 22
(Move: 44)

The marked exchange will help white with the fighting at the top.

Diagram 23
(Moves: 45-47)

In general, this sort of move is bad, because it damages the corner, but it was inevitable in this case.

Variation 139 from ④⑥

If black cuts here, without exchanging A for B first,

Variation 140 from ④⑥

Blocking here is good.

Variation 141 from 46

Black needs to come back here, but

Variation 142 from 46

Black can't win the capturing race between A and B.

White will win this capturing race.

Variation 143 from ④6

Black cut here, to counter-attack.

*Diagram 24
(Moves: 48-49)*

This atari was the right move, and

Diagram 25
(Move: 50)

Variation 144 from 49

If white still tries to capture black,

White can't extend his liberties now, so black will win this capturing race.

Variation 145 from 49

This is the right sequence.

*Diagram 26
(Moves: 51-52)*

This jump is the only move for black, and

Diagram 27
(Move: 53)

This hane aims at A.

Diagram 28
(Move: 54)

Diagram 29
(Moves: 55-56)

It ended with a big trade. Black got the top and the center stones, but black's top right corner turned into white's corner. The result was favorable for white, because white can still exploit aji at A-C later, or play at D-F, so black has bad aji at the top.

White caught up a bit here, but black's still slightly ahead on the board and white doesn't have komi.

Variation 146 from 54

If black plays here, for example,

Variation 147 from 54

White captures the cutting stones.

Diagram 30
(Move: 57)

This attachment was good. Black should attack white's marked group to get compensation now.

This knight's move might look good, but it's too loose.

Variation 148 from ⑤⑥

White can attach here and crosscut.

Variation 149 from ⑤⑥

Variation 150 from 56

White makes miai of A and B.

Variation 151 from 56

Black won't be happy with this result.

Variation 152 from ⑤6

If black extends here instead,

Variation 153 from ⑤6

This attachment is good, and

Variation 154 from 56

White can make a base for his group in the corner.
Next...

Variation 155 from 56

If black takes a big point, like this,

Variation 156 from ⑤⑥

White will bring his stones at the top back into play, making miai of A and B. It's quite annoying for black.

*Diagram 31
(Moves: 58-60)*

White exchanged these moves in order to settle his group.

Diagram 32
(Moves: 61-62)

It looks like it's too early to play here, but it helps white to settle the top left group.

Diagram 33
(Moves: 63-65)

Now, the aji at the top's gone, but white can still make use of the marked stones with the forcing moves in the center (marked).

Diagram 34
(Move: 66)

The hane at A would be the normal move now, but white played more actively here because it was a no komi game.

Diagram 35
(Move: 67)

This might look small, but it's the key point for the eye space of both groups and that makes it the key point for power in this part of the board. You should learn to spot these kinds of urgent points.

Diagram 36
(Moves: 68-70)

This jump was very good. White aims to make a placement at A later.

Diagram 37
(Moves: 71-72)

The opening up to A was good for white, but the game's still ok for black because there's no komi.

Black should have exchanged A for B, before attaching here.

Diagram 38
(Moves: 73-77)

If black had played here now,

Variation 157 from 76

White would answer and,

Variation 158 from 76

The game could continue like this. Black still has a small advantage (because there's no komi).

Variation 159 from 76

Diagram 39
(Moves: 78-81)

This was a probe, but it was a bit too late.

Variation 160 from 80

If black extends here, instead of playing at A,

White can live here, and it's ok for white.

Variation 161 from ㉔

Go Seigen decided to give the marked stones away.

Diagram 40
(Move: 82)

Variation 162 from 81

If white answers,

Variation 163 from 81

Black can extend here to fight.

White can't make an eye at A, so it's no good for white.

Variation 164 from 81

This placement was very sharp. The timing was perfect.

*Diagram 41
(Moves: 83-84)*

Diagram 42
(Moves: 85-87)

Black has to answer here, otherwise white can wedge and cut with A.

Diagram 43
(Move: 88)

This ponnuki is very nice. The result from A up to here was also good for white, and the game became even now. That means white had already caught up by as much as komi (i.e. 6-7 points).

Diagram 44
(Move: 89)

This was the right extension. It's better than playing at A, because black wants to limit white's influence in this game.

Diagram 45
(Moves: 90-91)

This was the proper move in this case. It's better than A because white can't easily invade at B in this case.

If black plays here,

Variation 165 from 90

This attachment is good.

Variation 166 from 90

White can cut at A to squeeze black later, and the result is good for white.

Variation 167 from 90

The game's even now.

Diagram 46
(Moves: 92-95)

Variation 168 from 91

If white invades here,

Variation 169 from 91

This is a good response, and

It's hard for white to fight or live.

Variation 170 from 91

White can't escape like this.

Variation 171 from 91

Diagram 47
(Move: 96)

It's a very good time to probe.

Diagram 48
(Move: 97)

This connection was right.

If black connects here,

Variation 172 from 96

This attachment (aiming at A) is good and,

Variation 173 from 96

Variation 174 from ⑨⑥

White gets sente, and plays here.

Variation 175 from ⑨⑥

White's right side becomes very big, and white's winning now.

Diagram 49
(Moves: 98-101)

This hane showed fighting spirit, but it was too much.

Variation 176 from 100

Black should have played here,

White gets to force here,

Variation 177 from ⑩⑩

But the game's still very close.

Variation 178 from ⑩⑩

Diagram 50
(Move: 102)

White seized a good chance here. Go Seigen doesn't miss his opponent's tiny mistakes.

Diagram 51
(Move: 103)

This is the only choice for black.

Black can't connect here, because

Variation 179 from ⑩②

Even though it's no problem to capture the corner,

Variation 180 from ⑩②

Variation 181 from 102

Black would lose four points compared to the variation I showed at move 101. That's why black couldn't play like this.

*Diagram 52
(Moves: 104-106)*

White lived in the corner, and black's lower side became thin.

Diagram 53
(Move: 107)

Black has to look after this group now.

Diagram 54
(Moves: 108-109)

Attaching like this is a good way to settle or make shape.

If white attached here,

Variation 182 from 107

Black can just pull back,

Variation 183 from 107

Variation 184 from 107

And attach.

Variation 185 from 107

White wouldn't like to leave black the aji of A-C and black's group is already alive because D is sente.

If white cuts here,

Variation 186 from 107

Black will break through and white will lose control of the fight. Black can ladder at A next or capture white's marked stones.

Variation 187 from 107

Variation 188 from ⑩⑧

Moving out like this would be dangerous.

Variation 189 from ⑩⑧

White can keep attacking like this and,

Black's in trouble because white has forcing sequences like A-C

Variation 190 from 108

This atari was right.

*Diagram 55
(Moves: 110-112)*

Pushing here doesn't work, because

Variation 191 from ⑬

This attachment is very good, and

Variation 192 from ⑬

Variation 193 from 111

White can't save the two stones.

Diagram 56
(Moves: 113-117)

Black makes good shape and the game's still close, but white's slightly ahead now.

Diagram 57
(Moves: 118-121)

The hane at the head of two stones is nearly always good.

Diagram 58
(Moves: 122-127)

This move looks small and slow, but it was necessary.

Variation 194 from ⑫⑥

If black doesn't reinforce at the bottom,

Variation 195 from ⑫⑥

White can invade here.

Variation 196 from ⑫⑥

If black responds here,

Variation 197 from ⑫⑥

Black's marked stones are captured.

Variation 198 from 126

If black answers here,

Variation 199 from 126

White can easily connect under like this.

Diagram 59
(Move: 128)

This knight's move was very good, and it's hard for black to make territory in the center now. The game's still slightly better for white.

Diagram 60
(Move: 129)

This hane was a probe, but it was premature, and it became the losing move.

Diagram 61
(Move: 130)

White doesn't want to pull back at A, because the game's very close.

Diagram 62
(Move: 131)

Black can't connect at A, because he'd lose two points, so he cut here.

Black lived in the corner. It appeared to be very successful for black, but white had a plan at the top.

Diagram 63
(Moves: 132-135)
⑬⑭ at a.

The timing of this forcing exchange was exquisite.

Diagram 64
(Move: 136)

Diagram 65
(Move: 137)

Black has to answer, otherwise white can capture black's top right group with A (which makes miai of B and C).

Diagram 66
(Move: 138)

This is what white was aiming at.

This double hane was brilliant, and white created a big ko.

Diagram 67
(Moves: 139-140)

It was very unfortunate for black that this area was a ko threat factory for white.

Diagram 68
(Moves: 141-144)

Diagram 69
(Moves: 145-147)

This was a good move for black, and now, white has two options.

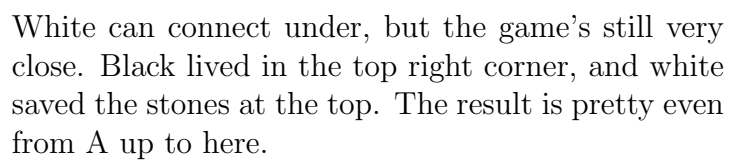

Diagram 70
(Move: 148)

White played atari here instead, making the ko even bigger. Go Seigen is extremely good at ko fights and trades, and he must have been sure that he was winning at this stage.

Variation 200 from 147

Variation 201 from 147

This was a good ko threat.

Diagram 71
(Moves: 149-150)

Black must answer here.

Diagram 72
(Move: 151)

If black doesn't answer,

Variation 202 from ⑮0

White captures the stone at A in sente, and

Variation 203 from ⑮0

White is winning now.

Variation 204 from 150

Black had some ko threats here, but they damaged the center.

Diagram 73
(Moves: 152-159)

155 at a,
158 at 152.

This was a good ko threat, and black doesn't have any ko threats after this.

Diagram 74
(Moves: 160-168)

①64 at a,
①67 at 161.

So black had to end the ko, but black wouldn't have felt happy about that.

Diagram 75
(Moves: 169-171)

Diagram 76
(Move: 172)

This atari was right. If white just cuts at A, black can atari at this point.

Diagram 77
(Moves: 173-174)

This was so big, and it was big enough to get compensation for losing the ko at the top.

Black can't connect here, because

Variation 205 from ⑪⑦②

There's no way for black's marked stones to live.

Variation 206 from ⑪⑦②

Diagram 78
(Move: 175)

Black pushed here to live,

Variation 207 from ①74

If black connects here to fight,

Variation 208 from ①74

This cut is good.

Variation 209 from ①74

Black's in trouble.

Variation 210 from 174

If black keeps going,

Variation 211 from 174

This is black's only big ko threat.

Variation 212 from 174

But white can connect here now. Black needs another ko threat, but he doesn't have any that are big enough.

Variation 213 from 174

If black plays here,

Black’s cutting stones can’t escape.

Variation 214 from ⑩

This cut was good.

Diagram 79
(Move: 176)

Variation 215 from 175

Variation 216 from 175

Variation 217 from 175

Black can connect under to catch up.

Variation 218 from 175

The game becomes close again.

Diagram 80
(Move: 177)

Black attached here to take sente, but it was questionable.

Variation 219 from ①76

Black should have played here instead. A is sente (because it aims to play B), so black can attach at C or D later. This way would have been more complicated than the game. Since black's already losing, he should look for a way to complicate things.

Variation 220 from ①76

There's no way for black to save the marked stones.

*Diagram 81
(Moves: 178-180)*

White's corner became solid territory, and the game became easy for white.

Diagram 82
(Move: 181)

This move was very big, but black's bottom group wasn't alive yet. And now, you can see that the exchange of A for B earlier was very far sighted and good for white.

Diagram 83
(Move: 182)

This atari was good, and it's painful for black because he's of short of ko threats.

Diagram 84
(Moves: 183-188)
187 at a.

White's position was already good enough, and black still wasn't alive.

Diagram 85
(Moves: 189-205)
195, 201 at a,
198, 204 at 192.

This ko threat was too small, but it couldn't be helped.

Variation 221 from (204)

Variation 222 from (204)

⑥ *at a,*
 ⑨ *at 3.*

White's winning by about 10 points.

Variation 223 from 204

White eliminated the ko, and the game was practically over now.

*Diagram 86
(Move: 206)*

Diagram 87
(Moves: 207-215)
 210 at a,
 213 at 207.

Even though black won this ko, white's lower side territory was huge.

Diagram 88
(Moves: 216-218)

White's winning by about 15 points.

Diagram 89
(Moves: 219-246)

Black resigned here.

It was an interesting game.

The first fight, starting with A, was very interesting, and the result of the trade was good for white.

The second fight, ending at B, was also good for white, and the game became even (without komi).

Ⓒ was a questionable move, and white took the lead in the game.

Ⓓ was a bit too early, and Go Seigen showed one of his specialties - fighting ko. He was able to use the ko to finish the game decisively.

Throughout the whole game, I couldn't find any mistakes or bad moves for white, and that's very impressive.

Top players today still make lots of mistakes. Even though the short time limits of today's games can partially explain this, it doesn't diminish Go Seigen's greatness and uniqueness.

Fujisawa Hosai was also one of the best players of his generation, but because Go Seigen was too special, Fujisawa's moves don't seem to be that special in comparison. His greatness was overshadowed by Go Seigen.

However, we should remember that he was the only player who ever managed to defeat Go Seigen in ten game match.

I hope you've enjoyed seeing this classic game and can feel some of the differences between this game and modern games. :)

Thanks,
